## Software Test & Support Engineer (m/f/d)

Research & Development

Innsbruck, Austria

Professionals Full-Time 38.5h Permanent

### Your Tasks

- Create, maintain, and execute manual and automated test cases and test plans to ensure the quality and reliability of our medical device software
- Collaborate with the development team to understand and review software requirements and identify test scenarios
- Incorporate exploratory testing techniques to proactively investigate and uncover potential software defects
- Provide 3rd-level support for clinical engineers to assist in resolving questions and issues related to medical device software
- Collect, analyze and document user feedback and bug reports

### Your Profile

- Bachelor's degree or higher (University, FH) in a technical field or equivalent education with several years of experience in software testing or software support
- Experience in test case design and test automation for mobile and desktop applications; ISTQB certification is an advantage
- Programming skills in an object-oriented high-level language are desirable
- Strong English skills, written and spoken and excellent communication abilities; German skills are a plus
- Positive, team-oriented mindset combined with an independent, precise working style and strong analytical problem-solving skills

### Further information

#### Minimum Salary

Annual gross salary from € 54,723.53, based on professional qualification and experience.
